

# Smart Tek

## Evaporative Air Vent Seal

### Product Description:

The Smart Tek Evaporative Air Vent Seal is a reusable cover that seals the ceiling outlet of a ducted evaporative cooling system.

The Smart Tek Evaporative Air Vent Seal is designed to restrict airflow from inside the residential premises into the evaporative cooling ductwork.

The Smart Tek Evaporative Air Vent Seal is designed to be installed on a temporary or seasonal basis.

It is re-usable and transparent.

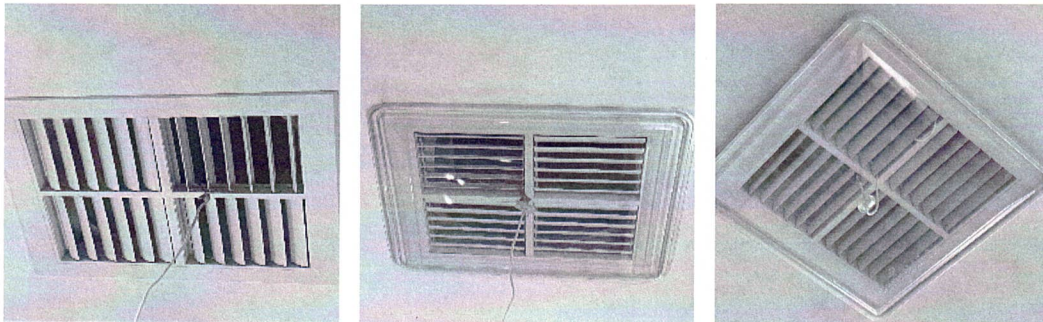

Models	Sizes
Evaporative Air Vent Seal	38*38*5 CM

### Installation Instructions:

1. Hook the included cord to the AC vent grill, making sure the connection is close to the center of the grill as possible.
2. Tighten the cord using the cord lock until the Evaporative Vent Seal is tightly covered around the AC vent.
3. Feed the cord into the hole provided to hide any excess cord.

### Important:

1. Don't forget to remove the Smart Tek Evaporative Air Vent Seal prior to operating your Evaporative cooling system.
2. Smart Tek Evaporative Air Vent Seals are recommended for Evaporative cooling systems only.
